INDEPENDENT AUDITOR'S REPORT

We have audited the financial records and operations of the **Governor's Cabinet Secretaries** for the year ended June 30, 2003. We conducted our audit in accordance with <u>Government Auditing Standards</u>, issued by the Comptroller General of the United States.

Audit Objectives, Scope, and Methodology

Our audit's primary objectives were to evaluate the accuracy of recording financial transactions on the Commonwealth Accounting and Reporting System, review the adequacy of the Secretaries' internal controls, and test compliance with applicable laws and regulations.

Our audit procedures included inquiries of appropriate personnel, inspection of documents and records, and observation of the Secretaries' operations. We also tested transactions and performed such other auditing procedures, as we considered necessary to achieve our objectives. We reviewed the overall internal accounting controls, including controls for administering compliance with applicable laws and regulations. Our review encompassed controls over the following significant cycles, classes of transactions, and account balances.

Expenditures Appropriations
Revenues Fixed Assets

We obtained an understanding of the relevant internal control components sufficient to plan the audit. We considered materiality and control risk in determining the nature and extent of our audit procedures. We performed audit tests to determine whether the Secretaries' controls were adequate, had been placed in operation, and were being followed. Our audit also included tests of compliance with provisions of applicable laws and regulations.

The Secretaries' management has responsibility for establishing and maintaining internal control and complying with applicable laws and regulations. Internal control is a process designed to provide reasonable, but not absolute, assurance regarding the reliability of financial reporting, effectiveness and efficiency of operations, and compliance with applicable laws and regulations.

Our audit was more limited than would be necessary to provide assurance on internal control or to provide an opinion on overall compliance with laws and regulations. Because of inherent limitations in internal control, errors, irregularities, or noncompliance may nevertheless occur and not be detected. Also, projecting the evaluation of internal control to future periods is subject to the risk that the controls may become inadequate because of changes in conditions or that the effectiveness of the design and operation of controls may deteriorate.

Audit Conclusions

The Division of Selected Agency Support Services within the Office of the Secretary of Administration provides financial and administrative support to the Governor's Cabinet Secretaries. We found that the Division properly stated, in all material respects, the amounts recorded and reported in the Commonwealth Accounting and Reporting System. The Division records the Secretaries' financial transactions on the cash basis of accounting, which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America. The financial information presented in this report came directly from the Commonwealth Accounting and Reporting System.

We noted no matters involving internal control and its operation that we consider to be material weaknesses. Our consideration of internal control would not necessarily disclose all matters in internal control that might be material weaknesses. A material weakness is a condition in which the design or operation of the specific internal control components does not reduce to a relatively low level the risk that errors or irregularities in amounts that would be material to financial operations may occur and not be detected promptly by employees in the normal course of performing their duties.

The results of our tests of compliance with applicable laws and regulations disclosed no instances of noncompliance that are required to be reported under <u>Government Auditing Standards</u>.

This report is intended for the information and use of the Governor and General Assembly, management, and the citizens of the Commonwealth of Virginia and is a public record.

We discussed this report with management on September 24, 2003.
